Implance Dental Implant System

Implance Dental Implant System, has played a very important role in the growth of the dental implantology sector in Turkey by developing new products of superior quality tailored to the needs of the industry.

Implance, with its investments in technological production and qualified staff, can be supplied in Turkey and all over the world in a short time, it provides the opportunity to find the best quality-price ratio.

Implance, has achieved world-wide recognition with many successful works from the moment of its establishment and became the first **FDA*** approved dental implant brand in Turkey.

Approved by the **FDA**, **Implance** has become one of the most trusted brands in the world by entering the US market with its outstanding product quality and special service network.

SHORT IMPLANT

In cases where bone level is insufficient in the upper and lower jaws, and when neither the mandibular nerve nor the sinus allow for regular implants, short implants may be an alternative solution instead of resorting to advanced surgery techniques.

ZYGOMA IMPLANT

ZYGOMA IMPLANT, is a special type of implant that can be used with patients with severe resorbed edentulous maxilla, where surgery and prosthetic rehabilitation can be very difficult.

It is an alternative dental implant that is used instead of laborious and difficult treatment methods, especially in patients who have some or all of the upper jaw bone removed due to accident or tumors.
